GEAR

Small and rarely seen. Usually cocooned withing signal range and horde of drones gathering tactical info.
DESCRIPTION

Clark was born into small family as an oldest child. He became a big brother at the age of five. He had natural talent in using all kinds electronic devices since childhood and quickly found himself more often at the family scrapyard than at home tinkering and driving all kinds of devices. One day when he was in his teens he was working and commanding drones as usual his brother walks in and yells that "You forgot you comlink at home, how the hell have you survived without it?" and suddenly I realize that I have commanded drones and talked to machines without using comlink at all. I quickly ran multiple matrix searches in panic to find out what had happened to me and started my new life long task of finding out what is it to be a technomancer.

After that I started improving my skills and practise. I noticed I could use program out of nowhere and even create them as needed and all these skill brought me new flexibility that I had never had before. As my skills grew our family scrapyard started to feel awfully small place. I pondered for a long while about leaving and finally I told my parents my decision. They gave me money to start out on my own that I used to buy and equip group of drones with intent to do some private security jobs and start myself a business. Those jobs were few and far between and I was forced to borrow money to keep going from shady sources but I still couldn't make a breakthrough into security business. Finally I was forced to look for alternative employment on the oppisite side of the law and found out that money was much better on that side...
BACKGROUND

Rigger first, hacker second.
